

TRAINING ANNOUNCEMENT

Advanced ECG & STEMI Triage

Topic: This Advanced ECG & STEMI Triage course is a focused educational program intended to build on the base knowledge that medic level providers already possess and expand on specific areas that may only be minimally covered in the EMT-I curriculum and Advanced Cardiovascular Life Support.

Brief list of objectives:

- Cardiac electrophysiology and intraventricular blocks
- Bundle Branch Blocks and AV blocks
- Pathophysiology of Acute Coronary Syndromes
- Lead placement related to cardiac anatomy
- Benefits and limitations of ECG automated interpretation
- Anatomy of the major coronary arteries
- Causes of ST segment changes
- 15-Lead ECGs and their significance

Dates: Tuesday and Thursday October 7th & 9th 18:00-22:00 hours

Location:

Staunton-Augusta Rescue Squad, 1601 N. Coalter Street Staunton

Cost: \$50 to be paid prior to start of class

Participants will receive *12-Lead ECG for Acute and Critical Care Providers*

Registration: Email mmccomas@cfw.com or call 540-480-2706 for information

Facilitator: Morgan McComas, ALS Coordinator
